Danilo Lima
Senior Software Engineer

10 Upper Friars Road, Turners Cross
Cork, T12 X2NY

Dear Hiring Manager,

My name is Danilo Lima, and I am a software developer with over 9 years of experience working across both back-end and front-end development. I have worked with a variety of technologies, including Java with Spring Boot, React, Node.js, JavaScript and TypeScript, as well as relational and non-relational databases (MySQL, Redis, Cassandra), automated testing, and infrastructure using Docker.

Throughout my career, I've contributed to challenging projects at companies such as Getrak, Phoebus Tecnologia, and Join Creative Technology, always focused on delivering robust, scalable, and well-tested solutions. I'm quick to learn new technologies, enjoy collaborating in agile teams, and continuously seek to grow both professionally and personally.

I am currently looking for new opportunities where I can apply my technical skills, contribute with my experience, and continue to develop. I'm especially interested in environments that value code quality, knowledge sharing, and continuous improvement.

Thank you for your time and consideration. I would be happy to further discuss how I can contribute to your team.
Sincerely,

Danilo Lima
