

Dear Hiring Team,

I am writing to express my interest in joining the company. With more than 15 years of experience working with data-driven decision-making, analytics, and business-oriented data solutions, I believe I can contribute both technically and strategically to your organization.

Throughout my career, I have worked in roles that required strong collaboration between business stakeholders and technical teams, translating business requirements into actionable data solutions and insights. My background combines analytical thinking, data engineering expertise, and a strong focus on delivering business value.

I have experience in international environments across Brazil and Portugal, working with companies such as Siemens, Cognizant, Celfocus, La Redoute, and KCS iT. In these roles, I participated in projects involving data platforms, ETL/ELT pipelines, cloud environments, reporting solutions, and operational analytics using technologies such as Power BI, SQL, Python, Snowflake, Databricks, Azure, AWS, and GCP.

What particularly attracts me to Vestas is the opportunity to contribute to a company that has a direct impact on the energy transition and sustainability sector. I am highly motivated by environments where technology and data can support smarter operational and strategic decisions, especially in industries that shape the future, such as renewable energy.

In addition to my technical experience, I have strong communication and stakeholder management skills, developed through years of working closely with multidisciplinary teams and supporting business areas with insights, reporting, and process improvements.

I would welcome the opportunity to further discuss how my background and experience can contribute to Vestas and your Business Analyst team.

Thank you for your time and consideration.

Kind regards,

Valmur Prado
